

GAP ANALYSIS REPORT

Opportunity: Hybrid Cloud Migration Suite

Offering: Cloud Migration Factory

Category	Details
Covered	Automated workload discovery for on-prem assets Zero-downtime migration execution workflow Azure landing zone with multi-subscription governance Cost governance model with FinOps KPI dashboards
Partial Coverage	Multi-region DR setup aligned to business criticality Application modernization readiness scoring Compliance mapping for regulated workloads (GDPR, PCI, RBI)
Missing	None

Consultant Narrative

****Gap Assessment Narrative: Legacy Workload Migration to Azure & AWS****

- ****Scope Alignment****: The proposed offering covers core migration needs—automated discovery*, zero-downtime execution, and FinOps governance—but lacks multi-region DR alignment with business criticality and compliance mapping (GDPR/PCI/RBI). Partial coverage of modernization scoring may delay ROI for apps requiring refactoring. ***Recommend***: Expand scope to include compliance blueprints and DR tiering to mitigate regulatory and resilience risks.

- ****Key Risks****:

- ****Technical****: Dependency on legacy app dependencies may disrupt zero-downtime execution without modernization.

- ****Governance****: Missing compliance mapping increases audit risks for regulated workloads.

- ****Cost****: FinOps dashboards alone may not prevent budget overruns without granular cost-tiering policies.

- ****Recommendations****:

- Integrate compliance guardrails and DR workflows into landing zones upfront.

- Pilot modernization scoring early to prioritize "lift-and-shift" vs. refactor candidates.

- Adopt phased region rollout with business continuity sign-off to align DR with criticality.

- ****Client Impact****:

- ****Speed-to-cloud**** accelerates with automation but may require additional compliance/DR planning.

- ****Cost control**** improves via FinOps, though unchecked legacy sprawl in cloud could offset savings.

- ****Risk exposure**** remains high for regulated workloads without proactive compliance embedding.

***Targeted next steps**: Roadmap workshop to address gaps in DR, compliance, and modernization scoring.*
